Jordan Lake needs these rules:

I live in the watershed and know that these rules to reduce nutrient pollution will mean cleaner creeks (and lakes and the Haw River) where I live.

I enjoy using Jordan Lake for swimming, boating, paddling, fishing, watersports or other recreation and want it to be clean enough to use safely.

I care about all that depend on a healthy lake, including the large populations of fish, and the nesting birds such as eagles, ospreys, herons, and egrets.

Much thanks for your attention,

Cathy Holt
